Permissions

DAVx⁵ requires permissions to work properly.

Keep permissions
Permissions may be reset automatically (not recommended)

All of the below
All permissions granted

Contacts permissions
Contact sync possible

**Calendar permissions**
Calendar sync possible

OpenTasks permissions
Task sync possible

Regular sync intervals
Disabled (not recommended)

For synchronization at regular intervals, DAVx⁵ must be allowed to run in the background. Otherwise, Android may pause synchronization at any time.

☑ I don't need regular sync intervals.*

Open-source software

We're happy that you use DAVx⁵, which is open-source software. Development, maintenance and support are hard work. Please consider contributing (there are many ways) or a donation. It would be highly appreciated!

HOW TO CONTRIBUTE/DONATE

☑ Don't show in the near future
